

## THE HEADLIGHT.

DAILY-WEAKLY.

ISSUED EVERY SUNDAY AND FRIDAY.

W. H. WALTON, EDITOR AND PUBLISHER.

SUBSCRIPTIONS

By the Year in Advance \$1.00.

Or paid in advance it will be \$1.00.

Per Month..... \$1.00

Single Copy..... 10 Cents

FRIDAY..... MARCH 10, 1893.

Don't imagine that the subscription price is not water-tight, because it is.

The latest railroad news from the City of Mexico would indicate early operations in Deming.

Let us have arid land for Deming and establish agricultural resources surpassing those of California.

It is about time to be thinking of three good men to serve as school directors and to be elected in June.

When you hear a person talking about an Italian climate, you may rest assured that he means Deming, as there is none other in the world.

Quite a boom prevails in the cattle business. Prices have advanced considerably and there is an increasing demand for all kinds of stock.

The sixth spring races of the Driving Park Association will be held in Albuquerque, May 10, 11, 12, and 13. Purse aggregate \$2,000 will be hung up, and a fine program of other sports will be given.

The government is getting ready to collect the income tax. The collector will find us around on Pine street, along with the other millionaires. P. S. We have no desire to cheat the government.

The government received \$22,515,023 for the bonds last issue; Rothschil of London, through his agents, Belmont and Morgan, sold the whole lot in New York in twenty minutes time, for \$25,517,000; a profit of \$2,512,000.

Among the deserts woods about Deming the mesquite is beginning to assume prominence for its usefulness in cabinet work. The grain is dense, a high polish is easily attained and long kept and the substance is almost indestructible by rot or time.

The air of Deming is pure, dry and bracing. It is, therefore, held by high medical authority that a residence here is unfailingly beneficial to persons afflicted with consumption, rheumatic, malacia, nervous and broncho-pulmonary troubles.

Under orders from General Manager Frey the Santa Fe men at Topeka have begun to work ten hours a day and six days in the week, instead of eight hours per day and five days in the week. The order affects every shop on the system, but in all others, except the general shops at Topeka, the increase is to nine hours per day. The increase is indicative of increased business, and is likely to be permanent.

THE HEADLIGHT has heretofore called attention to the wonderful opportunity open for progressive men in the local manufacture of paper and cordage from the leaves of the Yucca plant, so abundant in this vicinity. Practical experiments have demonstrated that this plant yields 20 per cent of the very best fiber, while the common soap weed, another growth covering these plains yields over 5 per cent. Materials for the manufacture of both paper and cordage are raised in the eastern states at a profit in which the percentage of fiber is much less and at a much greater cost of production than would be necessary here. The canary industry which has proven such a success does not begin to offer the inducements that do these. The Headlight has been giving the matter considerable study and within a short while a more comprehensive article will be published in these columns. We honestly believe that when the merits of the yucca and soap weed are fully understood an industry will be established here in Deming that will not only return thousands of dollars to its promoters but even a greater benefit to the people of Grant county.

The attempt to organize a party on one side—the silver party on the question alone—will prove a failure. Should it so succeed as to win one election it would die suddenly and very dead, as all one-side parties. Happily this new party is not necessary. From the foundation of the democratic party, which is also the foundation of the government, one of its first and most dearly prized tenets of faith has been the double standard, or gold and silver, each equal with the other, at the exchange ratio of sixteen to one. They can say what they please, democratic leaders of the Cleveland school and the republican foes of democracy, yet it is undeniably true that four-fifths of the democracy is to day founded upon and firmly planted upon the time honored old faith of hard money, the double standard, or, if you please, bimetalism. Whenever a thoroughly fair test is applied, the nation, the party and its foes will all see that this is true, true in every sense, and to all extends. Take this army of ten silver men, add to it all the other elements of gold to goldism and we would have twice as

## Why Was It

that Ayer's Sarsaparilla, out of the great number of similar preparations (successive ones throughout the world), was the only medicine of the kind admitted at the World's Fair, Chicago? And why was it that, in spite of the critical efforts of the manufacturers of other preparations, the decision of the World's Fair Adjudicators was not reversed?

### BECAUSE

According to Rule 35—"Articles that are to be any way dangerous or offensive, also patent medicines, narcotics, and empirical preparations, whose ingredients are concealed, will not be admitted to the Exposition," and, therefore—

Because Ayer's Sarsaparilla is not a patent medicine, not a nostrum, and not a secret preparation.

Because its proprietors had nothing to conceal when questioned as to the source from which it is compounded.

Because it is all that it is claimed to be—A Compound Concentrated Extract of Sarsaparilla, and in every sense, worthy the endorsement of this most important Committee, called together for passing upon the manufactured products of the entire world.

The sixth spring races of the Driving Park Association will be held in Albuquerque, May 10, 11, 12, and 13. Purse aggregate \$2,000 will be hung up, and a fine program of other sports will be given.

The Headlight has been giving the matter considerable study and within a short while a more comprehensive article will be published in these columns. We honestly believe that when the merits of the yucca and soap weed are fully understood an industry will be established here in Deming that will not only return thousands of dollars to its promoters but even a greater benefit to the people of Grant county.

The attempt to organize a party on one side—the silver party on the question alone—will prove a failure. Should it so succeed as to win one election it would die suddenly and very dead, as all one-side parties. Happily this new party is not necessary. From the foundation of the democratic party, which is also the foundation of the government, one of its first and most dearly prized tenets of faith has been the double standard, or gold and silver, each equal with the other, at the exchange ratio of sixteen to one. They can say what they please, democratic leaders of the Cleveland school and the republican foes of democracy, yet it is undeniably true that four-fifths of the democracy is to day founded upon and firmly planted upon the time honored old faith of hard money, the double standard, or, if you please, bimetalism.

Whenever a thoroughly fair test is applied, the nation, the party and its foes will all see that this is true, true in every sense, and to all extends. Take this army of ten silver men, add to it all the other elements of gold to goldism and we would have twice as

many votes as would be necessary to elect the next president. If we will fight for the next two years we will not only win at the polls but we will see the next new congress remonetize silver with hardly a dissenting vote.

It is time to accept the help offered in Doctor Pierce's Fa-

vorite Prescription. It's a medicine which has deserved and well deserved popularity for many years. In all cases of female complaint and the nervous disorders which arise from it. The "Pre-

scription" is a powerful uterine tonic and nervine, especially adapted to women's delicate wants for it regulates and promotes all the natural functions, builds up, invig-

orizes, etc.

Many women suffer from nervous pro-

stration, or exhaustion, owing to compression

or disorder of the special functions. The

waste products should be quickly got rid

of, the local source of irritation relieved

and the system invigorized with the "Pre-

scription." Do not take the so-called

celery compounds, and nervines which

only put the nerves to sleep, but get a

lasting cure with Dr. Pierce's Prescrip-

tion.

"FEMALE WEAKNESS."

Mrs. WILLIAM HOWEY, of Belgrave,

Richmond, Va., writes: I had been

sick and smitten from

females weakness."

I tried three doc-

tors; they did me

no good; I thought

I was an invalid for-

ever. But I heard

of Dr. Pierce's Prescrip-

tion and then I wrote to

him and he told me

just how to take it.

I took eight bottles.

I now feel entirely

well. I could stand

on my feet only a short time, and now I do

all my work for my family of five."
